## Repo

lab02 / Makefile  
scan.c ← scan.h  
test.ntc  
simple.ntc  
vars.ntc  
funcs.ntc  
README ←

extraneous  
lab02  
.o

```
$ make  
lab02 → scan  
$. /lab02 test.ntc  
$. /scan
```

What?  
How to build  
How to use  
Example input  
Example output

```
$ git add *
```

```
$ git add foo.c
```

```
$ mkdir scanner
```

```
;
```

```
$ git add scanner
```
