Review

uint32_t to hexstr

Project02 Grading

Due Mon Sep 21 11:59pm

In GitHub Repo

Individual work

Rubric:

60% passing tests in make test

40% Interactive grading and code quality

10% given question Q1

10% Q2

10% Q3

10% Code quality

Code quality:

- 2 inconsistent spacing or indentation
- 2 inconsistent naming or commenting
- 2 commented out code
- 2 redundant code
- 2 overly complicated code or messy repo

Source
Makefile
